Business & Delivery: Business Analysis, Requirements Gathering, Stakeholder Management, Analytics Consulting, Data Governance, Commercial Analysis, Agile, Jira, Confluence

AI & Automation: ChatGPT / OpenAI, Claude, Generative AI, Agentic Workflows, AI-assisted Automation, LLM Workflow Design, Python Automation

PROFESSIONAL EXPERIENCE

BOQ Group, Australia - CRM Data Analyst

Dec 2024 - Jun 2026

- Acted as the main CRM and Power BI analytics reference for the Digital & Marketing team, owning and maintaining trusted reporting across campaign, customer, lead, and commercial performance for business and leadership stakeholders.
- Scoped analytics and reporting solutions, gathered business and technical requirements, translated complex questions into data logic, and supported delivery across Bank of Queensland, ME Bank, and Virgin Money Australia.
- Collaborated with EY and Deloitte on strategic analytics initiatives; for the EY lifecycle marketing engagement, worked across Data Analyst, Business Analyst, and CRM/Power BI consulting responsibilities, including in-person project work in Sydney and governed Databricks workflows.
- Applied Python, AI/ML, and AI-assisted automation to data cleaning, recurring reporting, workflow automation, and forecasting support, while contributing to CRM data quality and governance standards.

BOQ Group, Australia - Retail Operations Analyst

Apr 2024 - Nov 2024

- Monitored sales and operational performance across approximately 111 Australian branches for credit products, using Power BI, advanced Excel, and Microsoft Dynamics 365 to support branch and regional decision-making.
- Managed customer and lead data quality in Dynamics 365 across a multi-brand banking environment, supporting Bank of Queensland, ME Bank, and Virgin Money Australia operations where relevant.
- Worked directly with regional and branch stakeholders, including on-site support and training during business travel, combining operational context with reporting and analytical insight.

Torrens University, Australia - Data Analysis Intern

2023

- Analysed institutional datasets and developed Tableau dashboards to support academic management and operational reporting.
- Used Python for data preparation, exploratory data analysis, and analytical workflows, translating institutional information into practical stakeholder-facing reporting.

Banco do Brasil, Brazil - Foreign Exchange Operations Intern

May 2017 - May 2019

- Supported GECEX foreign trade operations and the processing and settlement of export foreign exchange contracts in a compliance-oriented banking environment.
- Worked with structured documentation, transaction records, and foreign exchange document-management systems requiring accuracy, process discipline, and operational control.

SELECTED PROJECTS

BOQ Group - Digital Home Loan Lead Tracking

2024 - 2026

- Led an end-to-end lead-tracking framework for a developing digital home loan channel, connecting Microsoft Dynamics 365, Adobe Campaign, SQL, and Power BI; delivered the first release in approximately two months and expanded the reporting across brands, states, and business needs.
- Created a repeatable analytics standard supporting paid-media and channel decisions, campaign activations, CRM follow-up, lead quality, and customer acquisition visibility; the broader impact of this work contributed to Employee of the Month recognition.

BOQ Group - Market Intelligence & Customer Behaviour

2024 - 2026

- Combined internal CRM and customer-portfolio data with external demographic and postcode-level datasets to compare local markets with the bank's existing customer base.
- Enabled Marketing, Retail, branch, and leadership stakeholders to identify customer, product, geographic, and local engagement opportunities across an Australia-wide branch network.

BOQ Group + EY - Lifecycle Marketing & Campaign Performance

2024 - 2026

- Supported a governed campaign analytics framework covering lifecycle marketing, EDM/email campaigns, website activations, audience segmentation, control groups, and A/B testing.
- Worked with EY and internal data teams across Power BI, SQL, Adobe Campaign, Dynamics 365, and Databricks to translate marketing requirements into reporting logic while respecting customer-data governance and privacy constraints.
